Championship Show Winner
Class 12 - Clearwing

PETER DODD

Congratulations!

Breeder's Quality

GOLDEN COB®

Knows birds best.

Since 1895, we have been producing the GOLDEN COB® Breeder's Quality range of seed mixes, to provide Australian birds with the nutrition they need for health & vitality.

A diet of seeds alone is typically low in essential nutrients, but GOLDEN COB® seeds are coated with our unique vitamin & mineral enriched oil, to provide:

- ✓ **Vitamin A** – important for healthy immune system & good eyesight.
- ✓ **Vitamin D3** – to assist calcium absorption.
- ✓ **Vitamin E** – for reproductive health & increased fertility.
- ✓ **Iodine** – for healthy thyroid function.

Developed by reputable breeders & avian experts, the GOLDEN COB® Breeder's Quality range includes specially formulated products in 5kg & 20kg packs.

WORDS FROM THE EDITOR.

Hi members,

Well looks like the AGM is upon us once again, I'd like to start by thanking everybody for the support and patience everybody has had with me over the time I have been editor. We have had our ups and we have had our downs but that's ok, we strive to succeed in everything so let's keep doing that.

During my short time as editor we have enjoyed the few magazines I have published, plus the National mini magazine. I hope everybody is still enjoying this mini mag and keep yours for years to come. Don't forget this is purchasable from the society services section manager Kathy Manton.

I have had the opportunity to speaking with many of you throughout the time of me being editor and hope to continue what I have started and that is to produce a magazine worth the time and effort I put in for you guys the members.

Please if you have any concerns, corrections or suggestions please email me or if you call, leave a voice mail and I'll call you back ASAP.

Please also don't forget to update your details if they change, as I cannot keep your magazines coming to you if you do not update them. There are three two places you need to send them, to myself and to Myles Henke as we both coordinate the membership list and keep it updated. So an email to myself editor @budgerigar.com.au and to Myles memberships@budgerigar.com.au

I hope everybody enjoys the AGM and hope to see everyone there.

The Budgerigar Society of
New South Wales Inc is proud
to be affiliated with the
Australian National
Budgerigar Council

A WORD FROM OUR PRESIDENT.

SINCE BEING ELECTED IN FEBRUARY I HAVE ENJOYED THE POSITION VERY MUCH & HAVE VISITED 2 BRANCH MEETINGS SO FAR. AS I AM STANDING AGAIN FOR 2020 I WILL CONTINUE TO VISIT BRANCH MEETINGS OR ANNUAL SHOWS & MEETING MEMBERS AT THESE EVENTS AS TIME ALLOWS.

I WISH TO THANK STEVE CUMMINS & ANN HAND FOR THE WORK THEY PERFORMED FROM THE LAST AGM UNTIL CIRCUMSTANCES CAUSED THEM TO RESIGN IN JANUARY 2019.

THANK YOU TO MARK FINNIMORE FOR TAKING ON THE POSITION OF SECRETARY AND THE WORK THAT YOU HAVE DONE SINCE BEING IN THAT POSITION. TO STUART WILLIAMS & STUART FOSTER THE VICE PRESIDENTS FOR BEING READY TO ASSIST ME WHEN REQUIRED. THE TREASURER DAVID BUTTERS, MEMBERSHIP & RING REGISTRAR MYLES HENKE A LOT OF TIME & EFFORT HAS BEEN SPENT IN MAKING SURE THESE AREAS ARE UPTO DATE. THE COLOUR & STANDARDS, ANDRE OZOUX & JUDGES COMMITTEE, HEADED BY JEAN PAINTER HAVE KEEP THE MANAGEMENT COMMITTEE ON CURRENT INFORMATION FROM THOSE AREAS.

THANK YOU TO ANNA SHAW, THE EDITOR OF BUDGERIGAR, FOR PRODUCING AN INFORMATIVE PUBLICATION UNTIL STANDING DOWN AFTER THE JANUARY/FEBRUARY ISSUE. WE THEN WELCOMED JUSTIN MAGNEE TO THE EDITORS POSITION. HE HAS DONE A GREAT JOB IN PRODUCING ISSUES BI-MONTHLY SINCE THEN, INTRODUCING SOME NEW FEATURES TO THE MAGAZINE. AARON BEMAN HAS RECORDED THE MINUTES OF MANAGEMENT MEETINGS FOR US.

JIM BAKER STEPPED IN AS SHOW MANAGER & WE HAD A SUCCESSFUL STCC & ANBC SELECTION DAY WHICH RESULTED IN SECOND PLACE IN THAT COMPETITION AFTER VERY GOOD BIRD PREPARATION BY OUR CARERS ROB PEFFER, PAM HEWITT, TERRY BEVAN & JAMES MATTHEWS . JIM ALSO RAN OUR DELAYED ANNUAL SHOW BUT THE NUMBER OF ENTRIES & EXHIBITORS WAS DISAPPOINTING.

OTHERS ON THE MANAGEMENT COMMITTEE, IAN MANTON, FEHMEED BILGRAMI & KATHY MANTON HAVE COMPLETED THEIR TASKS WELL WHICH IS APPRECIATED.

TO MARK HAWKE, PUBLICITY OFFICER, A JOB WELL DONE OVER A NUMBER OF YEARS. THE SOCIETY THANKS YOU & WISHES YOU WELL ON YOUR TRAVELS.

OUR BSNSW OFFICIAL PHOTOGRAPHER, NOLA BRADFORD,(AND HER ASSISTANT BRUCE) HAS DECIDED TO STEP AWAY FROM THIS JOB. IT HAS GIVEN GREAT PLEASURE TO THOSE WHO HAVE NOT BEEN ABLE TO ATTEND THE ANBC SHOWS OVER MANY DECADES THE BEAUTY OF OUR BUDGERIGAR. BIG THANKS FROM ALL OF US

AFTER A HICUP DURING THE YEAR I LOOK FORWARD TO THE NEXT YEAR.

STEVE WACKWITZ, PRESIDENT

WORDS FROM OUR SECRETARY.

It has been my pleasure to take over as secretary for the BSNSW halfway through the year. I would like to take this opportunity to thank the Management Committee for their ongoing support. I also would like to thank all of the branches, associated clubs and members for your ongoing assistance in ensuring the society runs smoothly.

The most challenging part of this appointment has been ensuring all of the information for each Branch and Associated Club is current and up to date. I urge all Branches to continue updating me of any changes that occur during the year to ensure our members can contact any club and that our main form of communication, that being our magazine is always up to date.

I remind everyone who is a member to ensure they forward any issue or idea they have to me so it can be discussed at future management meetings to ensure the continued growth of our society. Looking forward to see as many members at the AGM and future society meetings.

Thanking you

Mark Finnimore

Secretary

SADDLEBACK BUDGERIGAR

The Standard

Mask and Spots:

Mask to be clear, wide and deep, (not cleft) extending beyond large cheek patches containing six large, round evenly spaced black spots. Each outer spot is partially covered by the base of the cheek patches.

Ground Colour:

Must extend over the back of the head into the mantle. Dark grey grizzled suffusion must appear in the ground colour on back of head and mantle.

General Body Colour:

Back, rump, breast, flanks and underparts to be a solid and even shade throughout.

Markings:

On cheeks, back of head, neck and mantle -- minimal. Wing markings, grey in the wing coverts, heavily grizzled with ground colour, merging to a definite black in the secondary and primary flights.

Eyes:

Black with a white iris ring.

Body Colour:

Full intensity

SADDLEBACK GROUP: This includes Yellow Faced Blue Series combined with Saddleback. The Standard for these birds is as for the Saddleback Blue series modified by the applicable Yellow Faced Blue colour with which it is combined.

Credit: Dennis Beckett Facebook

Distinguishing Features based on colour.

| Colour | Cheek Patch | Tail Quill | Tail Feather |
|-------------|-------------|------------|-----------------------------------|
| Light Green | Violet | Black | Mid Blue with Turquoise Suffusion |
| Dark Green | Violet | Black | Dark Blue |
| Olive | Violet | Black | Dull Blue Black |
| Grey green | Grey | Black | Black |
| Sky Blue | Violet | Black | Mid Blue with Turquoise suffusion |
| Cobalt | Violet | Black | Dark Blue |
| Mauve | Violet | Black | Very Dark Blue with Black sheen |
| Violet | Violet | Black | Deep Royal Blue |
| Grey | Grey | Black | Black |

SADDLEBACK BUDGERIGAR

Breeding Expectations

1. Saddleback x Saddleback
= 100% Saddleback
2. Normal x Saddleback
= 100% Normal / Saddleback
3. Normal / Saddleback x Saddleback
= 50% Normal / Saddleback
= 50% Saddleback
4. Normal / Saddleback x Normal / Saddleback
= 25% Normal
= 50% Normal / Saddleback
= 25% Saddleback
5. Normal / Saddleback x Normal
= 50% Normal / Saddleback
= 50% Normal

Nutritional Digestion Aids for Good Health and Wellbeing

TummyRite™

Avian Wellbeing & Health for Maintenance, Breeding and Show

An excellent mixture of nutritional herbs, enzymes, yeasts, prebiotics, amino acids, carotenoids, vitamins and trace minerals for birds of all kinds including breeding birds. Created for the individual aviculture enthusiast. Ideal for maintaining good health and wellbeing of birds and for avian fanciers preparing birds for showing and breeding.

StartRite™

A COMPLETE STARTER FEED, DESIGNED FOR HAND-REARING YOUNG AND GROWING CHICKS

Young growing chicks need significant nourishment to develop properly and grow. Applied Nutrition's StartRite™ is a specialised bird starter and hand rearing formula designed and developed to provide a complete complement of nutrients, protein, key essential amino acids, vitamins, trace minerals and major minerals to support good tissue, feather and skeletal development. StartRite™ also contains specialised components that aid the bird to develop its own natural immunity to disease challenges and to digest major feed component. Suitable for crop and spoon feeding or just topping up a range of young Passerine and Psittacine bird species.

Prosperity™

A Nutritional
Breeding
Formula

A COMPLETE STARTER, DESIGNED TO BE FED TO BREEDING BIRDS WHO WILL FEED IT TO THEIR YOUNG CHICKS - PROMOTES HEALTH & IMMUNITY

Applied Nutrition's Prosperity™ is a complete bird starter feed designed to be fed to breeding birds who in turn will feed it to their young chicks. Prosperity™ provides a complete complement of nutrients, protein, key essential amino acids, vitamins, trace minerals and major minerals to support good tissue, feather and skeletal development. Prosperity™ also contains TummyRite™ components that aid the bird to develop its own natural immunity to disease challenges and to digest major feed components. Prosperity™ is also good for feather development for adult birds going through the moult.

THE IMPORTANCE OF BALANCED PROTEIN IN THE DIET OF GROWING PASSERINE AND PSITTACINE BIRDS

Dr Michael Evans
Avian Nutritionist
Applied Nutrition Pty. Ltd.

Young growing birds need significant nourishment in order to develop properly and grow. Altricial birds have the capacity to grow extremely fast and therefore need significant nutrients in adequate amounts and in the correct balance. In captivity, birds are solely reliant on us to provide them with necessary nutrients, particularly protein, amino acids, vitamins and minerals, such as calcium and phosphorus, to grow tissues, skeleton and feathers.

Grains alone cannot provide all the necessary nutrients to support the early growth, feathering and development of young budgerigars. Many of the soft foods available on the market that are being used as supplements, when examined more closely, do not provide the necessary essential nutrients to fill the gaps (deficiencies) in the amino acids coming from grains. It must be remembered that protein is not a single nutrient, but a combination of other building-block components called amino acids. Amino acid composition of protein can vary from ingredient source to ingredient source. For example, the millets are particularly deficient in a number of key essential amino acids, such as lysine and methionine, which if not provided in adequate amounts, can slow growth and development of the young chick and impair feather growth and quality. All grains are also particularly deficient in calcium, and if calcium is not fed to the chick on a daily basis will lead to poor skeletal development and in some severe cases adversely impact on muscle function and blood clotting ability. The choice of soft food has to be on the basis of filling the gaps and correcting the deficiencies in the nutrients coming from the main food sources, i.e. the grains. Otherwise you just might as well feed straight grain.

Applied Nutrition has researched and developed a specific nutrient specification for growing birds from hatch to maturity. For newly hatched chicks, key essential amino acid daily intake is critical to their development and functioning as an adult bird. A comparison of this specification with the nutrient composition of seeds and seed mixes allows us to determine which nutrients are missing and therefore guide us in the correct supplementation. This is the principle approach used in developing our TummyRite range of products.

Applied Nutrition's **Prosperity™** is a complete bird starter food that has been designed and developed to provide a complete complement of nutrients, including protein, key essential amino acids, vitamins, trace minerals and major mineral such as calcium and phosphorus to support good tissue and feather growth and skeletal development in young birds, particularly during the first 14 days of life. **Prosperity™** is designed to be fed to the breeding birds who in turn feed it to their young chicks. In addition, **Prosperity™** contains **TummyRite™** components, such as herb extracts, yeast functional fibres and enzymes, that aid the bird to develop its own natural immunity to disease challenges and to digest major feed components respectively.

The protein in **Prosperity™** is pre-digested, but not a denatured protein, which ensures the protein is more bio-available to the bird, resulting in improved nutrient absorption. The pre-digested process reduces allergenic reactions in birds by removing the allergenic protein components, β -conglycinin, glycinin and lectins that are responsible for these allergenic reactions. **Prosperity™** contains lactic acid generated naturally through the fermentation process leading to a product of low pH and excellent palatability. The product stimulates high feed intake and assists favourable GIT micro flora and therefore assisting to reduce the pathogenic bacteria challenges in the gut. The improved digestion of major feed ingredients helps to reduce excessive gaseous emissions and reduces the impact of feed on the environment.

Amino acids are the essential building blocks of protein. During the production of body tissues, feathers and eggs, birds require the correct amount and balance of amino acids in their feed for them to do this efficiently, to minimise waste and optimise growth and development. **Prosperity™** provides those key essential amino acids and includes methionine, cystine, lysine, threonine, tryptophan and isoleucine.

Even birds fed at maintenance (i.e. to maintain good condition), the protein supplied in the diet should be well-balanced. Combining the best of the major ingredients in the diet will rarely result in a completely balanced diet, therefore, small amounts of essential amino acids will need to be provided to completely balance the diet. These key essential amino acids can be provided via **TummyRite™ Standard or TummyRite™ Plus**. **Prosperity™** can be used as a soft food to supplement grains, insects and nectar particularly during periods of high nutrient demand, such as bird going through the moult. Birds going through the moult will benefit greatly from having access to **Prosperity™** daily.

Prosperity™ can be fed dry, mixed with a small amount of water to make a crumble or mixed with a large amount of water to make a very runny slurry. Feed in a separate container from seed. Replace daily or if soiled. It is recommended that **Prosperity™** be fed before breeding at pairing and fed separately until the chicks have fledged. Thereafter it can be also blended with seed 30% seed 70% **Prosperity™**. Once the young birds are feeding on their own and separated from their parents, feed 50% seed 50% **Prosperity™** until the bird reach their mature body weight.

Once the birds reach their mature body weight, feed seed blended with **TummyRite™** at the recommended rate. Note: there is sufficient calcium in **Prosperity™** for the proper growth and development of the chicks. However, hens may need additional calcium if they are still laying eggs. This calcium can be provided in the form of **CalciRite™**, a source of good quality limestone grit, in a separate bowl or finger drawer. The addition of extra calcium in the water is another option, or if feeding calcium in the water is not convenient, feed **TummyRite™ Plus**, which contains additional calcium and electrolytes, instead of **TummyRite™ Standard**. We need to be mindful that budgerigars in general do not drink water as much as other bird species (personal observation). This makes it difficult when trying to administer nutrients or medicines via the water. Bird keepers need to make a judgement as the best way to do this to ensure adequate nutrient intake.

In conclusion, appropriate balanced nutrient delivery to birds according to their daily requirements is essential if birds are to thrive and develop properly. The appropriate choice of supplement to balance nutrients coming from the seed is the key to a successful feeding programme.

HOW TO SPROUT SEED

My birds get sprouted seed most days each week, year-round. Care must be taken to ensure the seed does not sour or go mouldy, otherwise the birds will become ill. Racehorse Oats are the seeds most frequently soaked and sprouted, but occasionally mung beans, lentils, or mixed seeds are used. The birds relish soaked and sprouted seed, especially when feeding young. Sprouted seed is an excellent way to include soft food and supplements to their diet.

Step One—Soaking Oats

First add cold or lukewarm water until totally covered then soak for 12 hours.

Step Two—Washing Oats

After 12 hours drain and wash the oats. You will be surprised how discoloured the water you soaked them in for the initial 12 hours is. Pour cold water over the oats until they are thoroughly washed, and the water runs clean.

Step Three—Drain Oats

After soaking and washing for 24 hours the oats are transferred to a colander with mesh or small holes the water can drain through. The oats are now rinsed/washed 2-3 times a day, until small white roots start to appear.

Step Four—Sprouting

When small roots start to appear it is time to start feeding to the birds. When introducing to your birds do not feed too many initially but gradually increase the amount. I have several "bowls" going at one time, so we feed oats at various stages of germination... from small roots beginning to show - to sprouts that are 2-3" long.

Step Five—Ways to Increase Protein and Adding the Soaked Seed to Soft Food

If you wish to increase protein intake you can always sprinkle or mix in egg food or other supplements. I mix my own "soft food" consisting of dried breadcrumbs, powdered egg, non-medicated chick starter crumbs, gamebird grower crumbs, powdered kelp, EMP egg food, Hormova, and a commercial nestling food.

The soaked seed is thoroughly rinsed and drained then the soft food is added, mixed in, and allowed to sit for 5-10 minutes so the crumbles absorb any moisture and soften.

To supply additional animal protein freeze-dried mealworms are soaked in warm water for several minutes to plump them up, then added to the mix. Mealworms are a great natural animal protein source. 50% Protein & 25% Fat... Once they get the taste the budgies love them and will pick them out of the feed before they touch anything else.

Ready for the feeding frenzy. Vegetables, Sprouted Oats & Mealworms are mixed and fed to breeding cages and the flights. This is fed in the morning and again late afternoon during the breeding season. Any leftovers are removed before lights out.

Our 2019 inaugural Spring Show was well received by members and exhibitors which was held on Sunday 22nd September. Exhibitors travelled from Sydney, Canberra and surrounding areas. With 231 birds from 22 exhibitors the judges Mario Capasso and Andrew Bourne had a steady flow of birds to judge. Well done to all the winners on the day and a full list is attached to the newsletter.
